JAG funded projects may address crime through the provision of services directly to individuals and/or communities and by improving the effectiveness and efficiency of criminal justice systems, processes, and procedures.

Once the State funding is calculated, 60 percent of the funding is awarded to the State and 40 percent to the eligible units of local government. State also have a variable percentage of the allocation that is required to be "passed through" to units of local government. This amount, as calculated by BJS, is based on each State's crime expenditures. Additionally, the formula then calculates direct allocations for local governments within each state, based on their share of the total violent crime reported within the state. Local governments entitled to at least \$10,000 awards may apply directly to BJA for local JAG grants.
